

DS-01 — Consumer Sales Transaction Analytics

Dataset ID: DS-01

Purpose: Provide quantitative transaction evidence for customer growth, basket growth, product mix, channel optimisation, and regional/channel strategy.

Instruction alignment: Supports the strategy framework's baseline, customer growth, frequency, basket, product mix, and channel growth questions. Consumer revenue excludes the separate Institutional/B2B stream.

Provenance & modelling note

This is a synthetic quantitative extension created for the Vayal Foods simulation. It is designed to be internally consistent with the supplied Vayal company documents and to fill quantitative evidence gaps identified by the strategy/instruction documents. It must not be treated as an audited source document. Known company totals are preserved where stated; newly introduced granular fields are modelling data. Annual consumer-channel total reconciles to ₹660.3 lakh: General Trade ₹284.0 L, E-commerce/Quick Commerce ₹158.8 L, Modern Trade ₹100.3 L, Export ₹66.9 L and D2C ₹50.3 L. Consumer product totals reconcile to P1 ₹228.3 L, P2 ₹153.1 L, P3 ₹129.4 L, P4 ₹99.8 L and P5 ₹49.7 L.

Monthly Product × Consumer Channel Sales

Revenue is net recognised consumer revenue. Cancelled orders are excluded. Product P1 excludes institutional 5 kg sales; P6 is handled in the separate B2B layer.
