

DS-02 — Customer Master, Lifecycle & Retention Analytics

Dataset ID: DS-02

Purpose: Provide customer-level aggregate evidence for acquisition, retention, reactivation, customer quality, lifecycle marketing, and customer value.

Instruction alignment: Directly supports customer retention/reactivation, lifecycle marketing, customer quality, acquisition economics, repeat behaviour and cohort analysis.

Provenance & modelling note

This is a synthetic quantitative extension created for the Vayal Foods simulation. It is designed to be internally consistent with the supplied Vayal company documents and to fill quantitative evidence gaps identified by the strategy/instruction documents. It must not be treated as an audited source document. Known company totals are preserved where stated; newly introduced granular fields are modelling data. Lifecycle metrics are analytical aggregates. Repeat-purchase rate refers to customers with more than one recognised purchase within the observation window.

Customer Master by Segment × Lifecycle

The master contains 60,000 customer records. 44,359 have recognised purchase activity; 15,641 are classified as No Purchase. Of the No Purchase group, 255 are cancelled-only customers.

Segment	Lifecycle	Customer Count	Repeat Purchase Rate	Avg Order Value Rs	Annual Revenue per Customer Rs	Median Days Since Last Purchase	Cancelled Only Count
Urban Family Households	No Purchase	4,507	0	0	0	—	0
Urban Family Households	New	2,335	0.08	546.00	588.00	28	0
Urban Family Households	Active	5,484	0.52	640.50	1,491.00	34	0
Urban Family Households	At Risk	2,291	0.34	682.50	1,102.50	118.00	0
