

DS-06 — B2B Account & Opportunity Analytics

Dataset ID: DS-06

Purpose: Provide quantified evidence for B2B expansion, account expansion, dormant-account reactivation, deal economics and sales-cycle realism.

Instruction alignment: Directly supports B2B expansion, account quality, pipeline conversion, deal size, gross margin, payment terms, sales cycle, and operational feasibility.

Provenance & modelling note

This is a synthetic quantitative extension created for the Vayal Foods simulation. It is designed to be internally consistent with the supplied Vayal company documents and to fill quantitative evidence gaps identified by the strategy/instruction documents. It must not be treated as an audited source document. Known company totals are preserved where stated; newly introduced granular fields are modelling data. Frozen orientation totals: 250 accounts, 520 opportunities, ₹538 lakh historical B2B revenue, approximately ₹590 lakh opportunity pipeline and ₹213 lakh won pipeline.

B2B Account Master — 250 Accounts

Historical revenue is recognised B2B revenue. Account fit and gross-margin fields are analytical management scores, not accounting records.
