

DS-07 — Inventory, Operations, Supplier & Fulfilment Analytics

Dataset ID: DS-07

Purpose: Provide quantitative evidence for operational bottlenecks, inventory planning, supplier reliability, capacity, stockouts, fulfilment and growth feasibility.

Instruction alignment: Directly supports operations/supply-chain strategy, product-led growth feasibility, inventory/working-capital strategy, supplier risk, demand forecasting and sustainable growth.

Provenance & modelling note

This is a synthetic quantitative extension created for the Vayal Foods simulation. It is designed to be internally consistent with the supplied Vayal company documents and to fill quantitative evidence gaps identified by the strategy/instruction documents. It must not be treated as an audited source document. Known company totals are preserved where stated; newly introduced granular fields are modelling data.

Monthly Operating & Inventory Summary

Finished-goods dispatches reconcile to the FY25–26 total of 405.6 tonnes. Inventory figures are month-end analytical balances; March balances reconcile to the supplied financial statements.
