

DS-08 — Financial, Channel Economics & Working-Capital Analytics

Dataset ID: DS-08

Purpose: Provide quantitative evidence for financial discipline, channel economics, product economics, contribution, cash timing and implementation-budget decisions.

Instruction alignment: Directly supports financial justification, product/channel economics, working capital, payback, fixed vs variable costs, contribution and the ₹10 lakh implementation budget.

Provenance & modelling note

This is a synthetic quantitative extension created for the Vayal Foods simulation. It is designed to be internally consistent with the supplied Vayal company documents and to fill quantitative evidence gaps identified by the strategy/instruction documents. It must not be treated as an audited source document. Known company totals are preserved where stated; newly introduced granular fields are modelling data.
