

DS-09 — Customer Experience, Support & Voice-of-Customer Analytics

Dataset ID: DS-09

Purpose: Provide quantitative evidence for customer experience, retention risk, service bottlenecks, product complaints, availability and product-development signals.

Instruction alignment: Supports customer experience strategy, retention, product repositioning, operational quality, channel experience and NPD prioritisation.

Provenance & modelling note

This is a synthetic quantitative extension created for the Vayal Foods simulation. It is designed to be internally consistent with the supplied Vayal company documents and to fill quantitative evidence gaps identified by the strategy/instruction documents. It must not be treated as an audited source document. Known company totals are preserved where stated; newly introduced granular fields are modelling data.

Monthly Customer Contact Volume by Category

Contact categories are designed to match the company's support taxonomy: status, product information, availability, subscription, bulk enquiry, returns, quality and product requests.
