

Company Blueprint (1)

DOCUMENT 1 – COMPANY BLUEPRINT

Internal Master Document

Version 1.0

1. Executive Summary

Company Overview

(Company Name – TBD) is a mid-sized Indian consumer electronics company headquartered in Bengaluru, Karnataka. Founded in 2017, the company has established itself as a rapidly growing challenger brand within India's consumer technology accessories market.

The company designs affordable, feature-rich consumer electronics targeted at students, young professionals, creators, and businesses. Manufacturing is outsourced to trusted OEM partners, while the company retains complete ownership of product design, branding, marketing, quality assurance, distribution, and customer experience.

Over the past nine years, the company has achieved consistent year-on-year growth and built strong brand recognition across India. However, as the business has scaled, sustaining profitable growth has become increasingly difficult. While overall business performance remains healthy, several operational and commercial inefficiencies have begun emerging, requiring strategic intervention before they develop into larger organizational challenges.

The company is not failing. It is not dominating. It is entering the most critical phase in its growth journey—transitioning from rapid expansion to sustainable scaling.

2. Company Identity

3. Vision

To become India's most trusted consumer technology brand by delivering innovative products that combine quality, affordability, and exceptional customer experience.

4. Mission

To simplify everyday life through reliable consumer electronics while continuously improving customer satisfaction, operational excellence, and product innovation.

5. Core Business Values

The company operates around three core principles.

Product Innovation

Products should continuously evolve to meet changing customer expectations while maintaining commercial viability.

Affordable Pricing

Customers should receive premium value without premium pricing.

Customer First

Long-term customer relationships are considered more valuable than short-term sales.

6. Market Position

The company competes within India's consumer electronics accessories industry.

It differentiates itself through:

Affordable pricing

Rapid product innovation

Strong online presence

Responsive customer support

Modern product design

The company is recognized nationally but remains a challenger brand competing against significantly larger organizations.

7. Business Model

The company follows an asset-light operating model.

Rather than manufacturing products internally, production is outsourced to certified OEM partners.

The company retains responsibility for:

Product Design

Product Development

Industrial Design

Branding

Marketing

Sales

Distribution

Quality Standards

Customer Experience

Warranty & Support

This enables rapid product launches while minimizing manufacturing risk and capital expenditure.

8. Business Scale

The company operates as a mid-sized organization with:

Approximately 180 employees

Multiple sales channels

Nationwide customer reach

Eight-product portfolio

Two warehouse operations

Established supplier network

Dedicated customer support operations

9. Revenue Channels

Revenue is generated through five primary channels.

The diversified channel mix intentionally provides multiple strategic opportunities while preventing dependence on any single platform.

10. Product Portfolio

The company intentionally maintains a focused catalogue.

Each product category serves a unique strategic purpose within the business.

11. Customer Segments

Students

Highly price sensitive

Promotion driven

Online-first buyers

Young Professionals

Convenience focused

Brand conscious

High repeat purchase potential

Creators & Gamers

Performance focused

Premium buyers

High expectations

Corporate Buyers

Bulk purchasing

Longer sales cycle

Lower return rates

Higher customer lifetime value

12. Organizational Structure

Founder & CEO

■■■ Sales

■■■ Marketing

■■■ Finance

■■■ Operations

■■■ Technology

■■■ Customer Success

■■■ Human Resources

The Founder remains actively involved in strategic decisions while department heads manage day-to-day operations.

13. Core Strengths

The company's competitive advantage is built around three pillars.

Product Innovation

Fast product refresh cycles allow the company to respond quickly to changing market trends.

Affordable Pricing

Efficient sourcing and disciplined pricing deliver strong customer value.

Customer Service

Responsive post-sales support strengthens customer trust and brand reputation.

14. Strategic Weaknesses

As the company has scaled, three interconnected challenges have emerged.

Customer Retention

Customer acquisition continues to perform well, but repeat purchase rates have not improved proportionately.

Underdeveloped B2B Business

Corporate sales remain significantly below their long-term potential despite offering attractive margins.

Marketing Efficiency

Marketing expenditure has grown steadily, but customer acquisition costs have increased faster than revenue growth, reducing overall marketing effectiveness.

These weaknesses interact with one another and should not be viewed as isolated problems.

15. Current Business Situation

The company has entered a growth plateau.

Revenue continues to increase, but the efficiency with which growth is achieved has begun declining.

Leadership has identified early warning signs across multiple business functions including customer retention, marketing efficiency, inventory planning, channel performance, and product mix.

None of these issues individually threatens the company. Collectively, however, they suggest that existing growth strategies are becoming less effective.

Management believes significant growth opportunities remain available, but identifying the optimal strategic direction has become increasingly challenging.

16. Business Lifecycle

Every product follows the same standardized lifecycle.

Market Research

↓

Product Opportunity Identification

↓

Product Design & Specification

↓

OEM Manufacturing

↓

Quality Assurance

↓

Warehouse Allocation

↓

Sales Channels

↓

Customer Purchase

↓

Customer Support

Customer Success

Customer Rating
Net Promoter Score
Resolution Time
Return Rate

Technology

Website Uptime
Website Conversion Rate
CRM Data Accuracy
System Reliability

Human Resources

Employee Productivity
Attrition Rate
Hiring Time
Training Completion

Departments optimise their own KPIs while contributing to overall company performance, creating natural trade-offs that require strategic decision-making.

19. Internal Design Philosophy (Not Visible to Participants)

This company has no single hidden problem.

Instead, it contains several interconnected inefficiencies that influence one another.

The business is intentionally designed so that:

Multiple evidence-based strategies are possible.

No single dataset reveals the optimal solution.

Participants must connect information across departments.

Strategic trade-offs are unavoidable.

Every recommendation can be defended—or challenged—using available evidence.

The objective of the case is not to discover the answer.

It is to construct the strongest evidence-backed business argument.

20. Cardinal Rules (Project Governance)

These rules govern every future document, dataset, KPI, disruption, and RAG response.

Every dataset must influence at least one meaningful business decision.

Every major strategy must be supportable—or rejectable—using evidence in the RAG.

No single dataset should reveal the best solution on its own.

The company should have multiple interacting inefficiencies, not one obvious problem.

Participants are rewarded for reasoning, not guessing.

Every disruption should modify the strategy, not invalidate it.

Every document must answer a legitimate business question.

Every number must have a reason to exist and should be traceable to another KPI or dataset.

No KPI exists in isolation—every metric has upstream causes and downstream effects.

Attribute	Details
Industry	Consumer Electronics
Market Position	Challenger Brand
Founded	2017
Headquarters	Bengaluru, Karnataka
Business Structure	Private Limited
Business Model	Asset-Light (Design, Branding & Distribution)
Manufacturing	Outsourced to OEM Partners
Primary Market	India
